V.HOW TO CONDUCT SELF-TESTING

★ This machine has a self-testor which locates any abnormalities with the machine should they occur.

[Self-Testing Procedure]

Turn power ON while pressing the push-button or either the 1st or the 2nd player side, and self-testing will follow automatically.

[Self-Testing Items]

(1) ROM Test:

When normal — "ROM OK" will appear on the screen, and the test will proceed to the next step.

When abnormal — "ROM ☐ ☐ " will appear, and the test will be suspended.

(2) RAM Test:

When normal — "RAM OK" will appear on the screen, and the test will proceed to the next step.

When abnormal — "RAM ☐ " will appear, and the test will be suspended.

(3) Sound OFF:

"SOUND OFF" will appear on the screen, and the sound that has been made to that time will stop, then, the test will proceed to the next step. The machine is out of order if the sound does not stop or the test does not proceed to the next step.

(4) Switch Test:

Switch names are displayed on the left side of the screen, while input conditions will be displayed on the right side. When the switch is ON, "0" is displayed for input, and when it is OFF, "1" is displayed. Conduct test while turning each switch ON-OFF — the test will advance to the next step after a minute.

Not used		1
2P side pushbutton		1
2P side joystick	Up	1
"	Right	1

"0" will appear when pushing the pushbutton on the 1st player's side.

Dip switch A	1	0	1	1	0	1	1	1
" B	1	1	1	1	1	1	1	0

(5) TV Monitor Test:

Cross hatch pattern will appear on the entire screen. Monitor adjustment can be done by means of the pattern.

- Self-testing will stop at this point. Turn ON power again when you want to resume game or execute self-test again.

* In case you have found any abnormality as a result of the self-test, contact the dealer who sold the machine to you.
